

Mag 3

The powerful product for an affordable price

The Mag 3 is a receiver designed to satisfy industry needs. It offers an easy to use, yet powerful product for an affordable price. With multiple frequencies and the ability to go up to 130 feet deep, interference doesn't stand a chance. Track on the Fly in walkover mode or use the Bore-To function. No complicated programming needed to switch from walkover to Bore-To and back. The power you need, the price you want.
